EXPERIENCE

Machine Learning Research Intern

June 2024 – Present

Towson University

Towson, MD

- Conducted data poisoning attacks on ResNet-50 and VGG16 models, demonstrating vulnerabilities in image/object classification systems and degrading performance metrics.
- Delivered detailed research presentations to executives, enhancing awareness and adoption of data security measures.

JP Morgan Chase Code For Good Hackathon

October 2024

JP Morgan Chase

Wilmington, DE

- Collaborated with a team of 5 developers to build a web application in 24 hours which helps a Delaware based nonprofit match volunteers with other local nonprofit organizations based on interests, background experience and best fit.
- Developed and implemented dynamic data visualizations for a recommendation system using React, enabling volunteers to view personalized metrics for nonprofit matches. Secured **1st Place** at the Hackathon.

Towson University Maker Fest Challenge

October 2024

Towson University StartUp

Towson, MD

- Partnered with 2 developers to build "CourseSight," (in a 24-hour sprint) a platform enabling students to share personalized course testimonials, helping peers prepare for future classes with deeper insights. Secured **2nd place** at the TU Maker Fest.
- Designed and implemented the courses section of the app, featuring course information, professor ratings, video testimonials, and user comments to give course insights and increase user engagement.

Discover Diversity Accelerator Program Fellow

May 2024

Discover Finance

Riverwoods, IL

- Collaborated with technologists to leverage Agile methodologies (Scrum) for managing projects and teams throughout the software development life cycle (SDLC), participating in sprint planning and retrospectives to drive improvements and optimize outcomes.

Walmart Global, Tech Leadership Program Fellow

February 2024

Walmart Global Tech and Sam's Club

Bentonville, AR

- Led a team of 4 students in a live coding session to optimize a retail application for customer shopping using Python, resulting in an improvement in customer coupon management efficiency.

PROJECTS

Stock Price Visualization | *Python, Git, React js, TypeScript - [Link](#)*

- Engineered a live graph to monitor stock prices using Python for server-side data processing, achieving real-time stock price monitoring with a visually appealing interface.
- Developed interactive client-side web interfaces with TypeScript and React, leveraging JPMorgan Chase's open-source software and utilizing Git for version control, enhancing data accuracy and user engagement.

LEADERSHIP AND CERTIFICATIONS

SEO EDGE Participant & Tech Developer Intern

August 2024 – Present

SEO Career

New York, NY

- Receive coaching and online instruction to achieve targeted interview, technical, and professional developmental goals
- Learn business fundamentals to compete successfully for internship opportunities
